

Interswitch Disbursements (Autopay)

Bulk payments, handled in one go.

Overview

Making bulk payments is not your favourite part of the job. Different banks, varying figures, and a huge list of people to settle. Wouldn't it be great if you could make and track all your bulk payments in one simple, efficient transaction without the stress?

That's why you need Interswitch Disbursements (Autopay).

A secure web based real-time solution that solves all your bulk payment challenges, whether it's for salary administration, contractor payments, or claims processing. Autopay gives you everything you need to manage, track, and process payments quickly, securely, and hassle-free.

How Autopay Makes Your Funds Disbursement Process Seamless:

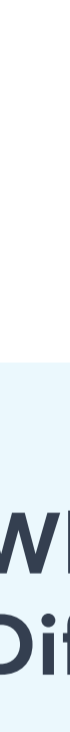

Autopay is more than just a payment system. It's a complete disbursement solution designed to streamline your payment processes:

- 

Salary Administration

Handle all employee payments, including bonuses and allowances, seamlessly across different accounts.
- 

Claims Payment

Efficiently process claims disbursements with instant transfers to beneficiaries, reducing processing time.
- 

Fleet Management & Account Monitoring

Manage and monitor payments related to your fleet operations and keep track of your bank balances in real-time.
- 

Contractor & Vendor Payments

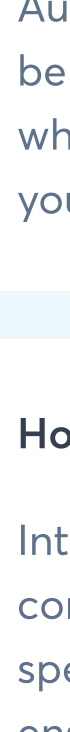

Contractor & Vendor Payments Automate payments to your contractors and vendors, ensuring timely settlements and better relationship management.

Autopay's Key Features & Benefits:

- 

Real-Time Payments

No delays or clearing periods. Autopay processes payments in real time, giving beneficiaries instant credit, every time.
- 

Multi-Bank Integration

Manage accounts from any Nigerian bank and facilitate transactions across them without worrying about complex systems.
- 

Easy Bulk Payment Upload

Quick upload of bulk payment files for faster processing and minimal manual work.
- 

Centralized Monitoring

View and manage all accounts from a single platform for streamlined reporting and management.
-

Flexible Payment Options

Send payments to bank accounts, mobile wallets, Verve prepaid cards, and Paycodes with ease.
-

Customizable Interface

Tailor the platform's appearance to match your organization's branding, ensuring a cohesive user experience.
-

Maker-Checker Feature

Enforce payment controls with approval limits and thresholds, ensuring compliance with your internal workflows.
-

Detailed Reports

Generate and customize reports that provide clear visibility into all your transactions.
-

Dedicated Support

View and manage all accounts from a single platform for streamlined reporting and management.

What Makes Autopay Different?

- ### 1 Full Transparency

Autopay eliminates the complexity and confusion often associated with bulk payments, offering clear visibility at every step of the process.
- ### 2 Minimal Infrastructure Requirements

Autopay is a web-based solution with minimal setup, making it easy to integrate into your existing systems without heavy infrastructure needs.
- ### 3 Instant Credit to Beneficiaries

No waiting for clearing periods. Beneficiaries receive payments instantly, with real-time updates.
- ### 4 Seamless Integration

Autopay easily integrates with your existing ERP or payroll systems, ensuring smooth payments between your system and ours.

Key Use Cases

-

Government Payments: Manage and process disbursements for loans, grants, and subsidies to citizens.
-

Corporate Payments: Simplify salary, contractor, and vendor payments within your organization.
-

Build, Operate & Transfer (BOT): Handle aid distribution, social service funds, and relief payments with ease.
-

FMCG (Fast-Moving Consumer Goods): Automate payments to distributors and merchants, ensuring quick settlements across multiple channels.

Frequently Asked Questions

Is there a set-up fee for integration?

There is no set-up fee for the generic Autopay platform. However, there may be fees for third-party integrations or white-labelling the platform to match your brand.

How long will the integration take?

Integration time depends on the complexity of the setup. Our generic API specs and dedicated technical team ensure a smooth integration process with your existing systems.

Is there a dedicated support team?

Yes, Autopay provides a dedicated 24/7 support team and a Customer Support Portal to help you track and resolve any issues promptly.
