

Wet Stock Management

See Your Fuel. Know Your Number. Control Your Business.

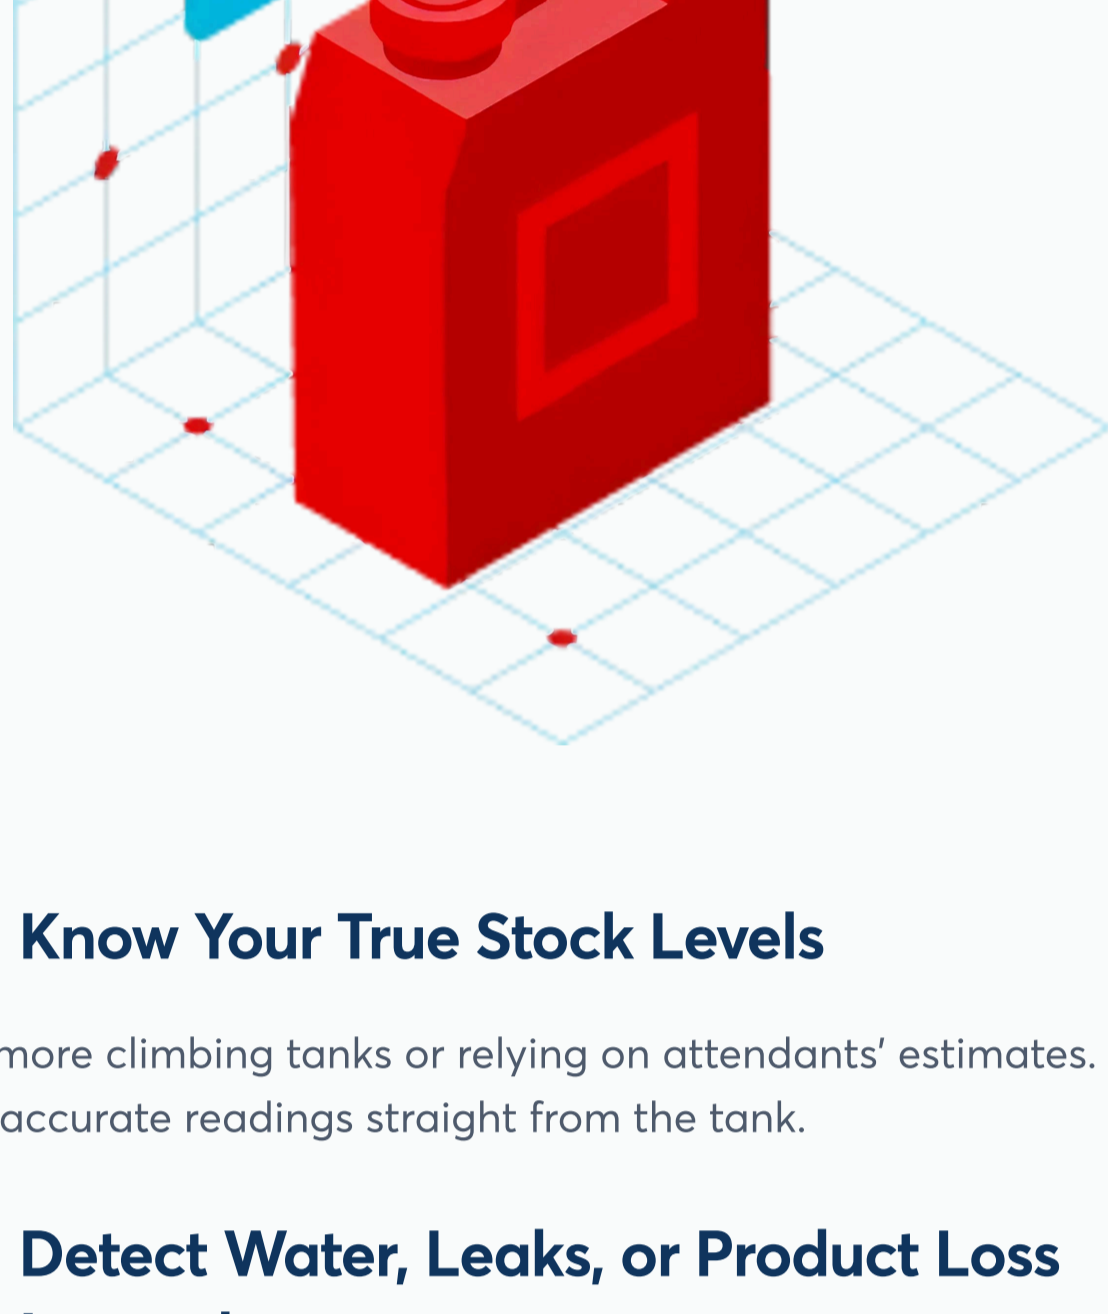

Overview

Fuel losses, inaccurate readings, and manual stock checks collectively cost station owners millions of dollars annually.

Interswitch SmartFuel Wet Stock Management addresses this with smart tank gauging and IoT technology, offering real-time visibility into tank contents across all stations. Experience visibility, accuracy, and control in one solution.

Why Wet Stock Management Matters

1. Know Your True Stock Levels

No more climbing tanks or relying on attendants' estimates. You get accurate readings straight from the tank.

2. Detect Water, Leaks, or Product Loss Instantly

Catch problems early, protect product quality, and avoid costly losses.

3. Track Every Delivery with Proof

See the time of delivery, quantity received, and tank status before and after delivery.

4. Automatic Reorder Alerts

Stay ahead of shortages with reorder-level notifications.

Wet Stock Management helps you stop losses before they start.

Core Features

Inventory Management

- Get accurate tank levels 24/7
- Track deliveries with timestamp and quantity
- Know product location and movements
- Reorder-level alerts
- Tank calibration support

State & Quality Management

- Water level detection
- Product purity and tank condition updates

Real-Time Monitoring

- 24/7 IoT-powered live data
- Seamless integration with the monitoring console
- Instant notifications

Reporting & Analytics

- Real-time data across all sites
- Auto-generated stock, consumption, and delivery reports
- Trend analysis, forecasting, and business insights
- Export in multiple formats

What You Gain

- 1 Better stock accuracy & stronger loss prevention
- 2 Faster reconciliation
- 3 Safer product quality
- 4 Predictable supply
- 5 Better profit margins

Wet Stock Management helps you stop losses before they start and makes managing fuel stock smarter and easier.
